For power ascenders (Actsafes), retractable fall arresters (Ikar) or rescue devices (EvaQ), the replacement of components - damage / wear and tear, is always consulted with the customer on the basis of a price quotation.

In the case of separable parts of the shock absorber (shock absorber-maillon-carabiner...) we calculate the individual components according to the basic price list.

Lanyards included in the price of the shock absorber.

The final price may vary according to the actual condition and type of equipment - only discoverable upon physical inspection.

The prices are without VAT.
